CULTIVATE CREATIVE LITERACY & CONFIDENCE
HELP YOUR CHILD FIND THEIR PASSION!

Reading & Writing Camps

Summer is the ideal time to nurture the joys of reading and writing in your child. Through a variety of texts, our students will enter new worlds, explore their interests, and fuel their imagination. Our reading and writing camps are designed to help students discover literary elements and discuss in a small group setting.

Our courses will help students develop their skills with reading comprehension, critical thinking, and textual analysis—all while exploring new vocabulary, genres, characters, and literary worlds.

For younger learners, they also practice time management and teamwork as they complete daily reading assignments, strengthen their phonemic awareness, and collaborate with their fellow lovers of literature!

Our courses are perfect for students looking to kindle their passion for reading while building and strengthening their writing and literacy skills to achieve success in their upcoming academic year.

STEAM & Math Camps

What is STEAM? Science, technology, engineering, arts, and mathematics! In our STEAM courses, students will rely on and develop their hard and soft skills to find solutions in problem-based learning.

Students will enjoy daily STEAM-based activities, created with that week's theme in mind. Every lesson will be academically sound, but filled with student-centred activities that children of all ages will enjoy.

HELP YOUR CHILD FIND THEIR PASSION!

Public Speaking & Debate

We welcome all aspiring young speakers: from the reluctant to the super-keen and able. Our ultimate goal is to help all students develop confidence and strategies to become comfortable with sharing information in the company of others. In our course, students will practice clearly expressing an idea in an entertaining and/or engaging manner.

All of our students will practice sharing key information, and they will strengthen their creative and critical thinking skills to problem solve.

Academic Coaching

Academic Coaching is the one-on-one process of helping a student examine academic concerns and perceived barriers to success.

Our Baker & Bloom Coaches provide individualized support according to your timeline, they will assess the student's strengths and needs, and devise a personalized plan of action in the following areas: exam preparation, specific learning needs, time management, procrastination, and more!

Form a Private Class!

Book one-on-one coaching sessions or form your own group of 3-6 students for a tailor-made class that suits your interests, schedule, and learning needs. Private sessions can cover any of the subjects or topics derived from any of our course offerings. Additionally, our skilled teachers can create a course based on your child's interests. Email or whatsapp us to start!

Caldecott Award Book Club (ENGLISH)

***For K1-2 students only.**

The Caldecott Award annually recognizes the most distinguished, beautifully illustrated, American picture books. In the Book Club, students will use these award-winning works of literature to further develop their burgeoning language, comprehension and creativity skills, while building a love for literature.

Phonics Builders (ENGLISH)

***For K1-2 students only.**

An Introduction to Phonics, your child will learn: letter names and letter sounds from a-z. All students will practice proper formation of uppercase and lowercase letters and their placement on guiding lines. They will be introduced to pre-writing skills and develop their gross and fine motor skills, form pre-writing shapes and lines, learn correct sitting posture and other cross-lateral skills.

Fun Fundamentals (ENGLISH)

***For K2-3 students only.**

Fun Fundamentals is a personalized review and extension of the groundwork skills necessary to be a successful reader and writer in kindergarten and the early primary years.

Each child will have a tailored set of activities designed to reinforce and strengthen key skills in decoding, comprehension, and written composition. This would be a great class if you are looking to help your child develop in all areas, including the more "traditional" academic courses.

Ages 3-5 Kindergarten

SUMMER 2023

About Our Courses

Creative Writing Program

The full writing process from start to finish. Students will have the chance to create an original idea, write in the specific style, and edit their work to create a unique project to bring home.

inspirED Reader & Writer Program

Students will have a holistic opportunity to experience all the elements of Language Arts including: grammar, spelling, reading, comprehension, and the writing process.

inspirED STEAM Program

For all hands-on learners! Our STEAM programs were made for you. Take a deep-dive into exciting and awe-inspiring topics that will spark creativity.

Public Speaking

Improve communication skills and confidence! Public speaking is an essential skill that students will be required to use for the rest of their lives. Summer is the perfect time to solidify their abilities.

Grammar Games (English)

***For K2-3 students only.**

Introducing Grammar to Kindergarten the Montessori way! A fun and multi sensory approach to Grammar instruction. Stories will be incorporated to help students see how grammar is used in authentic contexts.

Students will have the opportunity to understand the basic definition of nouns, adjectives and verbs through fun activities and games. They will be able to identify these grammar points from read aloud texts and learn to use them in sentences. They will also learn to compose crazy silly sentences that make grammatical sense.

The Wild World (STEAM)

***For K2-3 students only.**

Stepping out into the wild world, students will explore different environments of Earth and the animals that inhabit them. Taking a deeper long, and answering questions such as 'Why do giraffes have long necks?' or 'Why can frogs breathe underwater and in the air?'. These questions will be answered! This course will inspire young nature lovers and propel them into the exciting biology of animals.

Students on this course will have greater appreciation for the natural world. Students will develop their observational skills and critical thinking, while maintaining curiosity about the world around them.

Storytelling and Presentation

***For K2-3 students only.**

In this Story Telling & Presentation Skills course, students will build speaking confidence by giving oral presentations and telling their own stories. They will have a chance to fine tune their pronunciation skills with exercises in phonological awareness. Through picture book read-alouds, students will be encouraged to sequence a story, predict what will happen, to comment, and to connect between the story and their personal lives.

This group course is excellent for students who will be preparing for various school interviews.

Ages 4-5 Kindergarten

inspirED Chinese

啟。創。中文 暑期課程

學前班 (K2-3)

互動故事演說班

以聆聽故事、看圖說話、角色扮演等課堂形式，透過聆聽，口語、認讀、寫畫等綜合能力的訓練，擴充中文詞彙量，訓練口語表達能力，增強學生運用中文的信心和學習興趣，從而提升學生的中文能力。

趣味識字班

運用各種圖像和遊戲輔助孩子快速記住生字，運用循序漸進的方式教導孩子辨認常用字，讓學生可以活學活用，增強學習中文的信心。

G1-G2

閱讀識字班

以主題板塊為主。每堂課包含不同的主題詞彙、句式、語法及閱讀篇章。經過系統訓練，能認識基本的偏旁、部首、結構和漢字的演變規律。豐富詞彙量的同時，達到理解文章主題及自主閱讀的能力，全方位提升學生的中文水平。

活用拼音班

集中拼音教學，使學生快速、準確的掌握拼音文字。每堂課設有音節練習、聲調練習、視讀練習等等，運用各種活動、互動遊戲等形式增加學習樂趣，達到靈活運用拼音文字的目標。

Did you know?

Learning Mandarin can activate your child's brain power! The language uses both sides of the temporal lobe, whereas English speakers only use the left side.

Ages 4-5 Kindergarten

The Power of Description (ENGLISH)

Descriptive skills are essential when it comes to imbuing life into our stories. Children are naturally observant and in this course, we will use their observations through the five senses to craft richer stories. The children will work on their word choice and sentence fluency and will walk out with a booklet of powerful descriptions!

In this course, students will gain a grasp on the figurative language basics, practice using sensory language to create visuals with words. Students will be required to *show* not tell, and will be encouraged to engage in grade-level appropriate descriptive writing.

NASA Explorers (STEAM)

Embark on a distant journey and explore the mysterious universe. Learn all about stars, planets, moons, and galaxies, as well as the tools and technologies that NASA scientists use to study them. Students will tackle challenges such as human space exploration and develop ideas to overcome the biggest problems.

Students will develop important STEAM skills such as critical thinking, problem-solving, and collaboration, and be inspired to continue their journey into the incredible fields of astronomy, astrophysics, aerospace engineering and cosmology.

Literature from Southeast Asia

In this course, we zoom in on particular Southeast Asian cultures to learn about their unique ways of life and values. Students will focus on reading and discussing themes and big picture concepts which will aid developing their reading comprehension skills.

At the end of the course, students will bring home their own original story based on the themes discussed. In this class, students will be encouraged to develop their ability to plan, draft, and revise.

Ages 6-7 Grades 1-2

Math Carnival (MATH)

Join the circus for a week! Students will meet new and interesting circus performers while strategically helping to solve problems encountered at the circus. They will be challenged to analyze how to best spend their hard-earned money as they hone in their circus act. This course will help students apply what they learn in class and apply it to a fun real-world scenario.

Students will work on key math concepts in the G1-2 curriculum such as: financial literacy, representation of numbers to 1000, decomposition of numbers, fractions, multiplication, division, mental math strategies, geometry, graphs and more.

Creating Storybooks (ENGLISH)

Children are natural storytellers with vivid imaginations awaiting written expression! In this course, students will craft their personal narrative in the form of an illustrated storybook that can be treasured and shared with others. They will also be guided through interactive and creative tasks to help them create the book.

At the end of this course, student will understand the basic story elements. They will have written a story that follows the structure that they can bring home and share with family and friends. All students will walk through the editing process to create a final piece that they are proud of.

Gearing Up (STEAM)

Calling all future engineers! Students will learn the basics of mechanical engineering. Using gears made from simple objects they will be able to explore how objects move at various speeds and why this is. Students will explore questions such as, "What happens when the gears are linked together?"

The course is built on inquiry-based, student-directed learning based on Stanford Design Thinking, Harvard Ed Visible Thinking, and the MIT Media Lab Curriculum. All adapted for the Hong Kong Education System.

Ages 6-7 Grades 1-2

SUMMER 2023

Painting with Words (ENGLISH)

If a picture tells a thousand words, can a thousand words paint a picture? In this course, students will study details in mentor texts and illustrations to bring out their imaginations and enrich their writing with colourful words and author's craft techniques.

Students will gain a grasp on figurative language basics. It is a requirement to use sensory language to create visuals with words. This is a fantastic introduction for students who struggle with showing instead of telling.

MIT Scratch Your Ideas to Life! (STEAM)

This course will encourage students to get creative while learning an essential skill: coding! Students will learn the fundamental of coding and apply their knowledge to create their own animations, games and interactive stories. Students will further develop key skills such as problem solving, logical and critical thinking.

Students will be able to understand how to use a variety of code blocks, such as loops, if/then statements, variables, and more. They will develop a strong foundation in coding and be able to use the Scratch platform confidently, while producing their own unique digital creations.

SUMMER 2023

Artist Spotlight:

Yayoi Kusama (STEAM)

An introduction to the legendary modern artist Yayoi Kusama, this course will use her whimsical polka dot paintings and sculptures as inspiration for descriptive writing and hands-on creative practical art.

Students will have the opportunity to explore Kusama's background and artworks. They will be required to make inferences and take notes about their observations as they learn about various artistic principles. Throughout the week, all students will have the chance to create their own Kusama inspired sculpture.

Up For The Challenge (ENGLISH)

This course is for those who are up for a challenge. Every lesson, students will be given an open-ended writing challenge to complete. All students will start with the same initial task, but will be challenged to use their creativity and imagination to create their own unique and exciting texts. Students will be required to demonstrate their prior knowledge, and they will be introduced to other authors crafts that they can use to enhance their stories.

Children are then challenged to try different writing processes to produce short stories, reports, poems and other forms of writing. Students also encouraged to develop their existing knowledge of different styles of writing, including narrative, expository, persuasive, and descriptive writing. Their work will be added to a personal portfolio that can be shared with family and friends.

About Our Courses

Mystery Stories (ENGLISH)

In this bite-sized edition of our regular term course, students will put on their detective hats to read, solve, and write their own mystery stories. Students will build content vocabulary, put together evidence to find out "whodunnit?", and practise critical thinking skills.

Students will break down the mystery genre elements and vocabulary. They will practice the basic story structure, and learn how to create suspense in their writing. The class will engage in a group brainstorm, and work on the writing and editing process together.

Financial Literacy: Entrepreneur Ed (STEAM)

***OPEN FOR STUDENTS IN GRADE 3-6**

In this course students will have fun practising real-world math applications while opening and running their own pizza restaurant! They will be challenged to make decisions for their new business, practice strategic problem solving, learn to develop a budget and analyze numerical data from graphs.

Students will review important key concepts of the G3-6 curriculum such as: decimals, multiple digit addition and subtraction, multiplication, division, mental math strategies up to 1000, ratios, patterns, reading charts and graphs, fractions, and basic statistics.

"Thank you so much - [my child] is so PROUD to be reading and writing. His budding literacy has further bolstered his confidence and happiness.

I see him incorporating writing into his play (drawing/painting/etc). It was great to see his work in the booklets he brought home today. THANK YOU!"

Ages 8-9 Grades 3-4

About Our Courses

Creative Writing Program

The full writing process from start to finish. Students will have the chance to create an original idea, write in the specific style, and edit their work to create a unique project to bring home.

inspirED Reader & Writer Program

Students will have a holistic opportunity to experience all the elements of Language Arts including: grammar, spelling, reading, comprehension, and the writing process.

inspirED STEAM Program

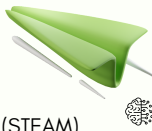

For all hands-on learners! Our STEAM programs were made for you. Take a deep-dive into exciting and awe-inspiring topics that will spark creativity.

Public Speaking

Improve communication skills and confidence! Public speaking is an essential skill that students will be required to use for the rest of their lives. Summer is the perfect time to solidify their abilities.

"Thank you for continuing to encourage my daughter's interest in writing, and to help her refine her thinking and skill!"

Python Programmers (STEAM)

Discover the world of programming with Python using a variety of amazing tools such as Trinket.io, Code Monkey and the Python Turtle. Students will be learning one of the most popular programming languages and apply their skills with a hands on approach. The world is ever evolving, and with the recent surge of AI technology, learning a coding language is now just as essential as any other.

Students on this course will be encouraged to use good programming practices, such as using meaningful naming conventions, using indentations correctly, and keeping things clear and well organised. Students will also learn the important processes of debugging and testing, allowing them to improve their logic and problem solving abilities.

Beyond Chat GPT (ENGLISH)

Chat GPT... a friend or foe? With the advancement of Artificial Intelligence, we want to prepare all students with the tools not just be successful in their futures, but to be independently successful.

Students will learn how to write and analyze texts without reliance on technology, and they will be introduced to Chat GPT and how it *can* be used in educational settings that benefit them.

Painting with Words (ENGLISH)

If a picture tells a thousand words, can a thousand words paint a picture? In this course, students will study details in mentor texts and illustrations to bring out their imaginations and enrich their writing with colorful words and author's craft techniques.

Through this course, students will gain a grasp on figurative language basics, practice using sensory language to create visuals with words, beintroduced to the art of 'showing not telling', and will engage in grade-level appropriate academic descriptive writing.

Ages 10-11 Grades 5-6

Skills Strengtheners (ENGLISH)

Are you ready for secondary school? This course will cover the key language, reading, writing, and thinking skills that students need to be successful. By the end of the week, students will have more confidence and as well as a portfolio showcasing their abilities as readers and writers of fiction and nonfiction.

Students will explore and analyse fiction and nonfiction excerpts and learn how to support their conclusions about a text with a basis of evidence – they will be ready for middle school in no time.

Beyond the 5

Paragraph Essay (ENGLISH)

Write like a pro! Real essays don't follow the formulas taught in schools. In fact, they break the rules! The word 'essay' means to try. It follows a writer's curiosity about a topic; it meanders, digresses, and ultimately discovers something unexpected about the topic and the writer, themselves. (For advanced writers only, who are already familiar with the rules.)

Financial Literacy:

Entrepreneur Ed (STEAM)

***OPEN FOR STUDENTS IN GRADE 3-6**

In this course students will have fun practicing real-world math applications while opening and running their own pizza restaurant! They will be challenged to make decisions for their new business, practice strategic problem solving, learn to develop a budget and analyze numerical data from graphs.

In this course, students will review important key concepts of the G3-6 curriculum such as: decimals, multiple digit addition and subtraction, multiplication, division, mental math strategies up to 1000, ratios, patterns, reading charts and graphs, fractions, and basic statistics.

Ages 10-11 Grades 5-6

SUMMER 2023

Academic Writing (ENGLISH)

The course Introduction to Academic Writing focuses on the academic skills and basic elements of academic writing. The aim of this course is to increase students' agency as writers by acquiring both the theoretical knowledge and practical skills necessary to produce texts for the interdisciplinary academic discourses.

A writing workshop designed to reinforce essay composition skills and introduce students to the practice of writing for academic purposes. It will prepare students for work in higher level English courses. The course will place equal or greater emphasis on macro-level composition skills such as: essay structure, paragraph structure, coherence, unity; and micro-level skills such as: sentence structure, grammar, vocabulary, spelling and mechanics.

"My son enjoys attending classes at Baker & Bloom and he comes home sharing with us what he did in class.

He is happy with the teacher and teacher always gives him an opportunity to answer questions and be part of the group."

SUMMER @ PLANET BLOOM

PROJECT-BASED DESIGN THINKING

Does your child love animals? Or do they want to be an architect?

Hear from industry experts! Visit unique locations on a field trip!

Be it big or small, your actions matter! Become Green Leaders and **MAKE A CHANGE!**

JULY 17 - 28

FOR AGES 5 - 12

Contact Us: 2311 2268 | WhatsApp Us: 5981 5959 | Email Us: info@bloom.edu.hk

SUMMER @ PLANET BLOOM INCLUDES

- Weekly field trip
- Industry expert sharing
- Hands-on project based learning
- Sustainability, green urban design and biodiversity focused
- Applying Harvard Project Zero and Stanford Design School Thinking Process
- Develop critical thinking, creative, and independent skills

EACH DAY, STUDENTS WILL WORK ON THESE 5 SKILLS:

HEALTH & SAFETY

Our program lead instructors have obtained FAA Level 3 in Emergency Paediatric First Aid (RQF) and are EDB Registered Teachers with PGCE certifications.

We have additional first-aid certified staff on-site, along with 24 hour security and facility supervision.

TIMETABLE

	Monday	Tuesday	Wednesday	Thursday	Friday
08:50	Arrival				
09:00	Campfire & Team Building	Field Trip	Project Design: Research & Thinking	Guest Speaker	Project Crafting: Hackathon @ Makerspace
09:45	Project Understanding: Challenges & Solutions		Reflection & Discussion		
10:30	Recess				
11:00	Project Design: Research & Writing	Reflection & Campfire	Project Crafting: Hackathon @ Makerspace		Pitch Day
12:00	Dismissal				
5 DAILY SKILLS	VOCABULARY	RESEARCH	WRITING	PRESENTATION	DESIGN

Does your child love animals? Or do they secretly want to be an architect?

Join "Summer @ Planet Bloom" as we tackle problems and solutions related to sustainability and the environment!

Through Bloom's project-based learning, this course will introduce students to the concepts and content in sustainability and biodiversity. Students will utilise the design thinking process to not only exercise creative and critical thinking skills independently, but also collaboratively on group projects to be made in our Makerspace.

Hear from speakers who are experts in the sustainability industry, visit unique and educational locations on a field trip!

Sign up for both weeks to get a special discount!

Be it big or small, your actions matter! Sign up, become Little Green Leaders, come up with solutions that can **MAKE A CHANGE!**
